

Roadmaster Steel Frame Classroom

The Roadmaster Steel Frame Classroom unit is a prefabricated building with a difference. Incredibly strong and durable, this unit affords the strength of a permanent structure without the hassle of a ground up build. Constructed using galvanized steel for both the frame and floor joists, this classroom is ready for long term heavy duty use. With washable vinyl coated internal walls, wet area with anti-slip floor surface, toilet facilities (including DOC M compliant) and cloakroom area, the Steel Frame Classroom unit is ready for all types of use.

Low maintenance, durability and flexibility – the Roadmaster Steel Frame Classroom is a turnkey solution that will meet your school's accommodation needs for many years to come.

To view our show model, visit our factory in Johnstown, Co. Kilkenny - just off the new M8 motorway

Framework exposed to display structure. Finished product clad in co-ordinating plastisol coated steel.

Roadmaster – Manufacturing prefabricated buildings in Ireland since 1960 – a name you can trust for quality, reliability and durability.
